

How Athena Transformed Business Operations and Accurate Reporting in Finance

Client

An MNC operating in a fiercely competitive market, reliant on efficient financial operations and accurate reporting to sustain profitability and strategic agility.

Problem Statement

The finance business faces challenges with fragmented financial operations across its global presence, leading to delays and inefficiencies in financial reporting. Additionally, the company needs help accessing real-time insights due to disparate data sources, impacting its strategic planning capabilities.

Solution

Athena played a pivotal role in transforming financial operations by:

- Enabled seamless integration of ERP, procurement, sales, and accounting systems via automated data pipelines.
- Implemented intuitive dashboards to visualize critical financial processes effectively.
- Enhanced accuracy in forecasting and reporting through advanced analytics.
- Addressed operational bottlenecks to streamline processes and improve efficiency.
- Introduced real-time alerts for immediate detection and resolution of financial anomalies

Value Delivered

- **Operational efficiency:** Reduced process cycle times by **20%** through streamlined financial operations.
- **Financial Reporting Accuracy:** Improved financial reporting accuracy by **15%** with integrated data and automated reconciliation.
- **Improved Strategic Planning with Real-time insights and predictive analytics**
